Dry Weight: Within normal moisture levels.

Active Bacteria: Bacterial activity above expected level.

Total Bacteria: Good bacterial biomass.

Active Fungi: Fungal activity within normal levels.

Total Fungi: Good fungal biomass.

Hyphal Diameter: Good balance of fungi.

Protozoa: Should provide a good inoculum of protozoa.

Total Nematodes: Excellent numbers, some diversity.

Mycorrhizal Col.:

TF/TB: Balanced fungal and bacterial biomass.

AF/TF: Good fungal activity.

AB/TB: Not mature. Wait to apply this material until activity drops below 0.10.

AF/AB: Balanced fungal and bacterial biomass, but becoming more bacterial.

Interpretation Comments:

Actinobacteria Biomass = 11.1 ug/g
Good fungal diversity, hyphal diameter: 1.5 to 6.0um
